DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian Ignat on June 22, 2010.

Claims 142-154 are cancelled.

Allowable Subject Matter

1. Claim 73-141 allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose, suggest, or teach a method of generating or modifying a program signal to provide protection against copying on a program recording device, the method comprising the steps of: receiving a program signal or information for generating a program signal divided into lines of information, said signal having horizontal synchronization pulses and vertical synchronization pulses for synchronizing the program on the screen of a receiver; adding a pulse into said program signal; adding a first modulation signal to vertical synchronization pulses of

said program signal; adding a second modulation signal to lines of picture information in the vicinity of said vertical blanking region at the bottom of a frame of said program signal; wherein said pulse, and said first and second modulation signals added to said program signal are sufficient such that when said signal is copied by the recording device, interference is produced in the reproduction of the copied signal that is not visible in the reproduction of an uncopied program signal; adding a pulse into said program signal during the horizontal blanking interval of lines that contain picture information and into lines in the vertical blanking region.
